Technology Summary

Senior Innovation Software Engineer and Technologist with over 15 years of experience building scalable front-end architectures with React and Vue.js and designing backend services in Python. Proven track record delivering interactive prototypes and data-rich dashboards and frameworks-such as with the Nike Sports Moment Experience team's platform-that accelerate concept validation. Skilled in RESTful API development, Git-based workflows, and agile practices, seeking to transition into an Associate Technical Architect role.

Skills

- **Programming Languages & Frameworks:** JavaScript, TypeScript, NodeJs, ReactJs, VueJs, NextJs, Python
- **Web Technologies & Design:** HTML/XHTML, CSS/SASS/SCSS, JSON, REST, CMS, Responsive Design, UX Design, npm, Next.js
- **Emerging Technologies:** Web3, VR/AR/MR/XR, Microservices, DynamoDB, Virtual Reality, Generative AI
- **Tools & Experience:** Git, Startup Experience, AWS Lambda, Front-end Development, Full Stack Development, Bash, Web Development, Product Development, Application Development

Employment

Nike **Jan 2022 - Present**
Senior Innovation Software Engineer *Portland, OR*

- Operate as a full-stack engineer in the Technology Innovations Office, building frontend features with Vue.js and backend services using Python on AWS Lambda and DynamoDB, and designing RESTful APIs for interactive prototypes that validate new concepts for rapid testing
- Collaborated with the Sport Moment Experiences (SME) team using Git and agile development practices to deliver event-driven, promotional, and marketing releases, ensuring a smooth user experience across digital platforms.
- Research and develop proof-of-concept projects that combine immersive V/A/XR experiences, dynamic 3D modeling, and advanced data visualizations, creating functional demos that inform future product directions
- Enhance front-end experiences by translating design mockups into functional prototypes with CSS/SASS and Vue.js, accelerating design validation and supporting innovative technology initiatives

Big Fish Games **Mar 2020 - Dec 2021**
Senior Software Developer *Seattle, WA*

- Develop front-end components with TypeScript, JavaScript, and ReactJS, integrating RESTful APIs and applying responsive design to deliver a smooth gaming experience that reduces load times and improves player retention
- Use HTML, CSS, and third-party JavaScript libraries such as Gulp to build and optimize data-driven UI elements, streamlining rendering and boosting overall performance
- Write design documents, code documentation, and unit tests with TypeDoc and Jest, supporting reliable front-end development and lowering defect rates
- Collaborate with product, design, and QA teams using Scrum ceremonies, JIRA, and Git to translate business requirements into React components, delivering features on schedule and meeting user expectations

Bittrex **May 2018 - Feb 2019**
Senior Software Developer *Bellevue, WA*

- Engineered front-end solutions for a blockchain and cryptocurrency exchange, using JavaScript and React to develop reusable components that enhanced user interactions on Bittrex.com.
- Built and maintained business websites on the Microsoft platform with React, MobX, and Node.js, implementing web sockets and microservices to deliver responsive, data-rich dashboards that increased user efficiency
- Managed DevOps responsibilities by establishing continuous integration and deployment pipelines with Azure DevOps, ensuring streamlined build and release processes.

NBCUniversal **Sep 2014 - Apr 2018**
Software Engineer *Seattle, WA*

- Led the implementation and deployment of video playback and interactive features on NBCNews.com, Today.com, and MSNBC.com, ensuring responsive design and cross-browser compatibility.
- Collaborated with UX teams, refactoring legacy code to React and integrating RESTful microservices, thereby enhancing front-end performance and user experience on video platforms.
- Developed an internal JavaScript library to support a modular, reusable video player framework, addressing media compliance and technical limitations across browsers.
- Coordinated deployment workflows using Git Hooks and ESLint with custom rules to maintain code quality and streamline QA/testing on team-managed environments.

Decisive Data **Apr 2014 - Sep 2014**

Software Developer

Redmond, WA

- Contributed to full-stack development on the Microsoft .NET platform using C# and ASP.NET, building responsive, data-integrated solutions for Sales and Marketing that improved user adoption and reduced reporting time
- Collaborated with a small team to design, implement, and deploy ASP.NET MVC 4 C# applications using Telerik Kendo UI, delivering a usable, high-performance product that received positive user feedback

Cottonwood Financial

Oct 2013 - Jan 2014

Solutions Developer

Dallas, TX

- Developed internal applications and enhanced third-party solutions with C#, ASP.NET, and SQL Server, which streamlined process automation and improved data-management accuracy

Forerun, Inc

Jan 2010 - Oct 2013

Developer / GUI Analyst

Dallas, TX

- Designed and implemented healthcare software solutions using ASP.NET MVC 3, jQuery, KnockoutJS, and SASS, ensuring a clean, responsive user interface.
- Created clinical and emergency room software applications to support volume statistics, patient triage, and reporting, enhancing usability for diverse healthcare settings.

Freelance

Jan 2009 - Feb 2014

Web Developer

Dallas, TX

- Built ASP.NET MVC websites for clients using Entity Framework, KnockoutJS, and responsive design, which ensured cross-device compatibility and earned positive client feedback
- Designed and executed graphic and photo manipulation projects with HTML5, SASS, and jQuery, delivering modern visual designs that improved site load speed and user engagement

Transnorm

Nov 2008 - May 2009

VB.NET / SQL Programmer

- Completed contract work developing functions and sub-procedures using VBA and SQL for a machinery engineering firm, ensuring data accuracy and operational efficiency.
- Maintained and updated legacy VB and VB.NET applications, using Git for version control, and generated custom Crystal Reports and Excel spreadsheets that streamlined cross-departmental data sharing, reducing report preparation time

Education

ITT TECHNICAL INSTITUTE

Dec 2009

AAS, I.T. Software & Applications Programming

UNIVERSITY OF NORTH TEXAS

Dec 2007

MBA, Finance

UNIVERSITY OF NORTH TEXAS

Dec 1999

BA, Radio, Television & Film
